

Week 3 – Hardware

Student number: 579444

Assignment 3.1: Examine your phone

What processor is in your phone?

Dimensity 8400-Ultra Octa-core Max 3,25GHz

To which architecture family does this processor belong? In other words, which Instruction Set Architecture (ISA) is used?

ARMv9.2

How much RAM is in it?

12 + 6 GB

How much storage does your phone have?

512 + 16 GB

What operating system is running on your phone?

Xiaomi's HyperOS 2

Approximately how many applications do you have installed?

~161 installed apps

Which application do you use the most?

Instagram and YouTube

Can your phone be charged with what type of plug?

It can be charged with USB-C.

Which I/O ports can you visually see on your phone?

Only the charging port – it doesn't have a jack on the upper side.

Assignment 3.2: Examine your laptop

What processor is in your laptop?

AMD Ryzen 7 Pro 4750U

To which architecture family does this processor belong? In other words, which Instruction Set Architecture (ISA) is used?

x86-64

How much RAM is in it?

16 GB

How much storage does your laptop have?

477 GB

Which operating system is running on your laptop?

Windows 11 Pro

Approximately how many applications do you have installed?

~80 applications

Which application do you use the most?

Discord

Can your laptop be charged with what type of plug?

It can be charged with USB-C.

Which I/O ports can you visually see on your laptop?

I have 2 USB ports, 1 USB-C port, 1 HDMI port, 1 jack, 1 SD Card port and 1 other that I don't know what exactly it is.

Assignment 3.3: Power to the laptop

What is the input voltage?

100-240V

What is the output voltage?

20V

How many watts can your power adapter deliver?

65 W

Is the input voltage AC or DC?

AC

Is the output voltage AC or DC?

DC

AC/DC what is that?

AC/DC stands for Alternating Current/Directive Current.

If you reverse the polarity of the output voltage, is that bad for your laptop?

Yes, it's really bad, because some of the components allow current flow in only one direction.

You forgot your power adapter, your laptop normally needs 15 watts. You will be loaned a power adapter that can deliver 50 watts. Voltage, polarity, etc. are all the same compared to the original power adapter. You can connect the borrowed power adapter to your laptop. What will happen? Also explain why you think that.

It will work, because the laptop will get the 15 watts it needs, because the 50 watts the adapter provides is just available power, not forced power.

Assignment 3.4: Build your dream PC

Screenshots PC configuration + motivation:

Total: €2517.27								

Assignment 3.5: Adders

Complete the **half adder**, **full adder** and **4-bit adder** assignment as described in the PowerPoint slides of week 3 in Logisim. Save the chip design and also export three PNG pictures of the separate finished designs. See the PowerPoint slides of week 3.

Paste the three exported PNG pictures in here.
